

# DE5245BCR1D/2D sim card dispenser

## Barcode Card issuing machine for kiosk

DE5245BCR1D sim card dispenser

DE5245BCR2D

Specifically developed for kiosks, where a high level of reliability and durability is required. The card dispenser, based on a unique and reliable mechanism and completely frictionless, allows for a perfect operation without incident for 2 million runs. All of the precise parts for the mechanism are produced on machine tool.

### Features:

- Card extraction from hopper, positioning under the barcode reader and reading it.
- Presentation of the card in a bin.
- Internal card capture with waste system WS452 or WS454 option.
- Adjustable scanner positioning.

### Applications

- Vending machine for sim card of mobile.
- Acces control
- Swimming pool ticketing
- Card parking system

### Specifications

- Scanner 1D (DE5245BCR1D) or 2D (DE5245BCR2D) adjustable positioning.
- The smallest device on the market – only 8,6' deep
- pre empty card detection
- Accepts ISO-standard thickness plastic cards, 0.5 to 1mm
- Hopper capacity: 250 cards (thickness 0.75) option: 500 cards
- RS232c Interface
- Dimensions w: 80mm (3,15') h:270mm (6,6') d:220mm (8,6')
- Power supply: 24v DC +/- 10%
- In compliance with CE and RoHS standards.
